

Hyundai Heavy Industries (HHI) Selects ORBCOMM's Satellite Network For Global OEM Heavy Equipment Telematics Application

Fort Lee, NJ, March 20, 2009 – ORBCOMM Inc. (Nasdaq: ORBC), a global satellite data communications company focused on providing Machine to Machine (M2M) solutions, today announced that Hyundai Heavy Industries' Construction Equipment Division has selected ORBCOMM's satellite network to provide global communications for Hi-Mate, its telematics application for heavy equipment.

HHI has signed a multi-year agreement with ORBCOMM's country licensee and reseller, Korea ORBCOMM, which will include rollouts of the new services throughout the world. Initial deployments have already begun in North America and will be expanded over time to include additional regions.

"HHI's selection of ORBCOMM further validates our position as the leader in heavy equipment telematics amongst global OEMs, and we are delighted to be working with them," said Marc Eisenberg, Chief Executive Officer of ORBCOMM. "The systems developed by HHI will benefit from ORBCOMM's global two-way data communications capability and coverage, giving its customers considerable operating advantages, such as increased safety, higher productivity, greater availability, and better control of their assets."

"The decision by HHI to include a telematics solution using ORBCOMM was the result of extensive testing conducted over several years," said Gene Song, Chief Executive Officer of Korea ORBCOMM. "We are looking forward to a long relationship with HHI as they roll out this system to their customers throughout the world."

Hi-Mate was developed in-house by HHI as an onboard vehicle monitoring and communications system that will allow owners and operators to monitor machine operating metrics, asset productivity, and performance information, around the globe. The system utilizes satellite communication hardware technology developed by Quake Global, a leading device manufacturer for multiple applications utilizing ORBCOMM's network.

About ORBCOMM Inc.

ORBCOMM is a leading global satellite data communications company, focused on Machine-to-Machine (M2M) communications. Its customers include Caterpillar Inc., Doosan Infracore America, General Electric, Hitachi Construction Machinery, Hyundai Heavy Industries, Komatsu Ltd., and Volvo Construction Equipment among other industry leaders. By means of a global network of low-earth orbit (LEO) satellites and accompanying ground infrastructure, ORBCOMM's low-cost and reliable two-way data communications products and services track, monitor and control mobile and fixed assets in four core markets: commercial transportation; heavy equipment; industrial fixed assets;

and marine/homeland security. The Company's products are installed on trucks, containers, marine vessels, locomotives, backhoes, pipelines, oil wells, utility meters, storage tanks and other assets. ORBCOMM is headquartered in Fort Lee, New Jersey and has a network control center in Dulles, Virginia. For more information, visit www.orbcomm.com.

Forward-Looking Statements

Certain statements discussed in this press release constitute forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. These forward-looking statements generally relate to our plans, objectives and expectations for future events and include statements about our expectations, beliefs, plans, objectives, intentions, assumptions and other statements that are not historical facts. Such forward-looking statements, including those concerning the Company's expectations, are subject to known and unknown risks and uncertainties, which could cause actual results to differ materially from the results, projected, expected or implied by the forward-looking statements, some of which are beyond the Company's control, that may cause the Company's actual results, performance or achievements, or industry results, to be materially different from any future results, performance or achievements expressed or implied by such forward-looking statements. These risks and uncertainties include but are not limited to: the impact of global recession and continued worldwide credit and capital constraints; substantial losses we have incurred and expect to continue to incur; demand for and market acceptance of our products and services and the applications developed by our resellers; loss or decline or slowdown in the growth in business from the Asset Intelligence division of General Electric Company ("GE" or "General Electric" or "AI"), other value-added resellers or VARs and international value-added resellers or IVARs; loss or decline or slowdown in growth in business of any of the specific industry sectors the Company serves, such as transportation, heavy equipment, fixed assets and maritime; litigation proceedings; technological changes, pricing pressures and other competitive factors; the inability of our international resellers to develop markets outside the United States; market acceptance and success of our Automatic Identification System ("AIS") business; the in-orbit satellite failure of the Coast Guard demonstration or the quick-launch satellites, satellite launch and construction delays and cost overruns and in-orbit satellite failures or reduced performance; the failure of our system or reductions in levels of service due to technological malfunctions or deficiencies or other events; our inability to renew or expand our satellite constellation; political, legal regulatory, government administrative and economic conditions and developments in the United States and other countries and territories in which we operate; and changes in our business strategy; and the other risks described in our filings with the Securities and Exchange Commission. Unless required by law, we undertake no obligation to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise.
