

Global M2M: Connecting the world's assets.

It's our vision to keep the world's assets—
no matter how far afield—always within easy reach.

Introducing the world's only commercial satellite network
100% dedicated to M2M.

We're committed to your success.

What is ORBCOMM?

ORBCOMM is a leading provider of global satellite and cellular data communications solutions for asset tracking, management, and remote control. Our global network and unique management tools enable delivery of small quantities of information to and from virtually any place in the world on a near real-time basis—simply and affordably.

A company on a mission

It's our mission to provide reliable satellite and cellular data communications for remote assets anywhere by:

- Maintaining our global low-Earth-orbit satellite network;
- Making service delivery and maintenance simple, and
- Enabling complete communications and device management through a unique set of tools, platforms, and partnerships with tier-one GSM (global system for mobile communications) and CDMA (code division multiple access) providers and others.

Customer focus

You can depend on ORBCOMM and our technology to deliver anytime, anywhere because we put your needs first in developing new offerings and solutions, and supporting them once deployed.

Moreover, we continuously seek new ways to solve customer problems and are always investing in unique and creative offerings.

Why ORBCOMM?

Organizations all over the world already depend on ORBCOMM for reliable data communications to and from anywhere. Why? Because no other network offers:

- Two-way data communications anywhere on earth;
- A convenient, cost-effective combination of satellite and cellular data service for the ultimate in cost optimization;
- The tools you need to manage your communications, devices—even your data—for optimal oversight and control;
- A satellite network specifically dedicated to machine-to-machine communications. You're our top priority and we understand your unique needs, and
- An established, financially-stable satellite operator committed to investing in the latest technology with regular launches to support long-term, up-to-date technology that will enable your application for years to come.

Our services

With ORBCOMM, companies have the choices they need to tailor the perfect balance of coverage and cost, including:

Satellite M2M for dependable, two-way communications in even the most remote places on Earth.

Terrestrial M2M for economical communications with devices in fixed locations or travelling exclusively within cellular coverage areas.

Dual-mode M2M for the ultimate in coverage and cost efficiency.
