ORBCOMM®

**WHERE IoT POWERS ASSET INTELLIGENCE™**

The ORBCOMM platform

It all comes together here with next-generation analytics and reporting

Multiple assets shouldn't mean multiple screens or applications to monitor and analyze your operation. While telematics solutions can help with visibility, running different systems from different providers is frustrating and inefficient.

The ORBCOMM platform is a single, unified, next-generation analytics and reporting platform that unlocks data-rich insights from your assets so that you can make faster, more accurate, better informed decisions. The all-new, cloud-based platform puts everything in one place with intuitive icons to distinguish asset types, reports by asset type, customizable workspaces and user access control.

Your data, your way, anywhere you want

Manage multiple assets through one seamless application from the office, at home, on the road or anywhere else. Get informed quicker through tighter reporting intervals and uncover deeper insights about your business through advanced analytics. With ORBCOMM, you get one provider with one user-friendly platform, so you can efficiently optimize asset usage, easily comply with regulations, protect your cargo and improve safety, performance and productivity.

The ORBCOMM platform: key benefits

Visibility
Monitor multiple asset types via one seamless application, enabling you to make critical decisions based on accurate information.

Accelerated insight
Uncover deep insights about your business through advanced analytics and faster data access.

Future proof
Built for the future, the platform will support the evolving need for increased data and more sophisticated solutions in a 5G IoT ecosystem.

Flexibility
Personalized user experience unlocks relevant data faster for every user in the organization.

Scalability
The platform is scalable to suit any size of operation, whether you have 10 or 10,000 assets.

Configurability
Advanced permissioning, role allocation and authority levels improves data security, reduces business risk and has the potential to extend data access to customers.

Control
Make better financial decisions by maximizing asset utilisation with all your data in one place.

Improved ROI
Increased usability and utility will maximize the return on your technology investment.

Key features

Any asset, anywhere

Our end-to-end telematics solutions enable comprehensive visibility and management so you can track, monitor, control and manage your assets in one place. Not just reefers, dry trailers and trucks, but chassis and dry and refrigerated shipping containers on road, rail and sea, along with integration with sensors for fuel, doors, cargo, temperature and more. Get the big picture through one source of information, with a single view of all assets and a single sign-on.

Advanced analytics

Collecting data on your assets is only useful if you can turn it into actionable information. The ORBCOMM platform delivers a wealth of information that can transform the way you do business by digging deeper into data to reveal hidden opportunities.

Self-service configurability

Take control with enhanced user, roles and permissioning for users, admins, groups and even customers. You decide which organizations, features, assets, devices, geofence, menus and data elements that users and groups see and control, with functionality to suit beginner, advanced and power users.

Personalized usability

With a modern, easy-to-use, intuitive interface, users find the platform quick to learn and flexible enough to accommodate basic, advanced or power users. Users can customize the data they need to see with preferences, saved searches, scheduled reports, workspaces, widgets and data filters.

New reports

Bring new insights to the surface with dashboards and additional new reports to serve up critical information— and drill down quickly to find the information you are looking for. Schedule reports, use alerts and review exception workspaces to focus on what really matters.

Open and scalable

Enrich your organization's TMS, ERP or third-party systems through flexible APIs and comprehensive integrations, giving you the opportunity to export telematics data from the ORBCOMM platform to internal or external dispatch and proprietary enterprise systems.

Five reasons to choose ORBCOMM

1 ***25 years' experience***
Choose a company that's proven itself through 30 years of operation and 500,000 assets in the field, and whose solutions have been widely deployed by some of the biggest names in the industry.

2 ***Seamless integration***
Already using other critical enterprise applications like a transport management system? Our flexible APIs and comprehensive integrations seamlessly deliver rich asset data to your existing third-party or proprietary enterprise systems.

3 ***End-to-end***
Our solutions feature proprietary, best-in-class technology and include intelligent IoT telematics devices, seamless satellite and cellular connectivity and the powerful ORBCOMM platform, all backed by end-to-end customer support through all aspects of deployment and beyond.

4 ***Single-source solution***
Eliminate the risk and complexity of sourcing multiple providers for different assets. Unlike competitors, we provide integrated, proprietary end-to-end solutions for nearly every asset class. The devices, the connectivity and the ORBCOMM platform are all designed to work together, and there's only one number to call if an issue arises.

5 ***Complete support***
With global best-in-class multilingual sales, service and 24/7/365 technical support teams, we support customers from requirements assessment to installation to ongoing free customer care.

ORBCOMM®

WHERE IoT POWERS ASSET INTELLIGENCE™

ORBCOMM is a global leader in industrial IoT, delivering visibility, intelligence and efficiency to the world's most critical operations. With 30 years of innovation and more than 2.4 million connected devices, we transform data into actionable insights, driving greater efficiency, safety, resilience and sustainability. Serving customers that include the world's largest shipping lines, over-the-road trucking fleets, cold-chain transportation fleets and a global network of IoT solution provider partners, ORBCOMM is where IoT powers asset intelligence.
