

## IC 500

### In-cab camera for complete critical event capture.

Capture critical events on video with a virtual witness for improved driver safety and visual proof against false claims.

The IC 500 in-cab camera captures video of incidents such as hard stops, harsh accelerations, rolls and high-impact events. It helps protect against false claims and costly litigations, maintain company credibility, protect against liability, decrease risky driver behavior, and increase the overall safety and security of fleet operations. Integrated with ORBCOMM's BT 500, the IC 500 delivers video evidence of events that can be used in litigation as proof of what happened. Streamline the accident reconstruction process, identify and correct high-risk driver behavior and protect your business when incidents occur outside of your drivers' control.

#### Critical Event Video

When a serious driving incident occurs, understanding the cause is crucial from a liability perspective and for preventive coaching. The IC 500 automatically registers critical events such as rolls and crashes. Video of the moments before, during and after the incident is delivered to fleet managers in near real-time for analysis or to be used as evidence.

#### Configurable Event Video

The IC 500 can also be configured to automatically record and send other event video based on customer-defined thresholds. Video of these events—harsh braking, speeding, hard stops, lane drifting tailgating and more—can be useful for training drivers and improving accountability.

#### Complete Picture

During critical and configured events, the IC 500 can also capture what occurs inside the cab with a peripheral inward-facing camera that comes as an optional feature. This secondary point of view helps provide a more complete picture of the event by adding footage of driver behavior as further evidence of innocence. If driver privacy is a concern, the IC 500 delivers all front-facing capabilities without the secondary camera.

#### Instant Replay

Event-triggered footage is automatically stored and can be reviewed at any time. The device also captures and stores the complete recording of all activity for up to 7 days to allow for comprehensive footage analysis when needed.

**Video evidence of driver innocence**

**Near real-time visibility into incidents**

**Seamless integration with our truck management solution**

**Quick and easy installation**

**Improved driver safety and training**

**BT 500 Integration**

The IC 500 integrates with our BT 500 telematics device to enhance the visibility, monitoring and management of your fleet. Including video allows customers to analyze

footage in conjunction with other of data from the BT 500 to create a complete picture of events and establish a deeper understanding of fleet activity.

**Camera**

HD 720p, 120° viewing angle

**DVR**

30fps, 720p

**Storage**

32GB SD Card

**Power Supply**

DC 12-24V

**Dimensions**

4.3 x 2.72 x 2.05 inches

**Weight**

.5 lbs

**Mounting**

Mounts to windshield

**Inward-Facing Camera**

- External
- USB connection
- AHD
- 720p, dynamic frame rate, 100° viewing angle
- Night vision
