

# Working Hours Analysis

## Strengthen tachograph compliance with in-depth working hours analysis

Improve operational efficiencies, compliance and deadline management as well as administration cost saving

Working Hours Analysis (WHA) is part of FleetManager, unlocking advanced data for drivers, vehicles and working hours all on one platform. It enhances telematics data by combining social infringements, drivers' working hours, attestation of activities and compliance data to give a complete compliance overview, improving deadline management and calculations of fines and expenses.

### Deadline management

Keep drivers on the road and reduce administration time spent on driver cards and licence renewal. Our deadline management helps to avoid driver cards or licences expire without warning and keeps track of tachograph test dates.

### Social infringement analysis

Understand the big picture with deep analysis of working hours and drivers' infringements. Prioritise issues for correction by drilling down to rank and identify individual drivers according to the type and severity of infringements, including the calculation of fines.

### Different rule sets

Maximise driving time and compliance with EU rules and regulations. Monitor drivers hours based on different rule sets, including the 12 Day Bus Rule for international passenger transport, and calculate fines for any infringements.

### Attestation of activities

Ensure compliance with drivers' working hours and reduce administration for an attestation of activities. Accurately record non-driving hours including sick days, annual leave and driving of exempt vehicles—which cannot be recorded by the tachograph—and generate digital forms of attestation.

### Expenses\*

Be confident in the knowledge that your drivers are receiving the correct expenses for their journeys. WHA accurately calculates expenses for several European countries or your company's rates. Predefine expenses based on night, weekend and one-time occurrences.

### Create Letters of Attestation

### Analyse social infringements

### Schedule custom reports

### Schedule deadline reminders

### Calculate cross-border expenses

### Monitor using different rule sets

### Upload DDD files easily

\* Available in Germany and Austria only

## DDD files upload

Stay compliant and audit-ready with DDD files available to download automatically, so you can access driving hours, working time, rest times, speed, driving events and more. Provide evaluations on-demand for authorities in the event of an inspection. Move seamlessly between suppliers by accessing six months worth of data from previous systems by DDD.
