

## ORBCOMM'S ISATDATA PRO (IDP) CORE MODEM IS NOW COMMERCIALY AVAILABLE

*Demonstrates compliance with Inmarsat communication requirements and network protocols*

**Rochelle Park, NJ, January 26, 2016** –ORBCOMM Inc. (Nasdaq: ORBC), a leading global provider of Machine-to-Machine (M2M) and Internet of Things (IoT) solutions, today announced that its new OGi core modem is now commercially available. The [ORBCOMM OGi modem](#) has demonstrated compliance with Inmarsat's requirements for RF communication utilizing the Inmarsat I-4 L-band satellites along with the IDP network protocol.

The ORBCOMM OGi modem is a software-defined radio that leverages the ORBCOMM satellite modem platform. With a footprint nearly 50% smaller than a credit card, both ORBCOMM's [OG2 and OGi modems](#) utilize the same electrical and application interfaces, including the connectors, power input and programming environment. This interchangeable format enables customers to plug-n-play satellite connectivity utilizing the [ORBCOMM VHF network](#) and/or the [Inmarsat L-band network](#) without the need to redesign their [M2M solutions](#). Similarly, data delivery for both the ORBCOMM and Inmarsat networks is transmitted through a common interface provided by the [ORBCOMMconnect](#) portal. ORBCOMMconnect provides data from three satellite networks and seven terrestrial networks using a single connection, reducing the complexity of managing and integrating global M2M assets across multiple networks and technologies.

“This exciting milestone brings ORBCOMM one step closer to creating a truly standardized satellite M2M platform,” said Craig Malone, ORBCOMM's Executive Vice President of Product Development. “ORBCOMM's interchangeable modems can utilize either the ORBCOMM or Inmarsat networks, providing our customers with unrivaled ease of use, flexibility and quality of service based on their unique application needs, including message size, delivery speed, geographic coverage and regulatory requirements.”

The OGi modem is the smallest and lowest cost IDP modem built to date. ORBCOMM is actively engaged with multiple customers integrating this standardized portfolio of [M2M modem technology](#) into their hardware solutions to enable asset tracking and monitoring applications within the marine, heavy equipment and transportation markets.

### **About ORBCOMM Inc.**

ORBCOMM Inc. (Nasdaq: ORBC) is a leading global provider of [Machine-to-Machine \(M2M\) communication](#) solutions and the only commercial satellite network dedicated to M2M. ORBCOMM's unique combination of global satellite, cellular and dual-mode network connectivity, hardware, web reporting applications and software is the M2M industry's most complete service offering. Our solutions are designed to remotely track, monitor, and control fixed and mobile assets in core vertical markets including transportation & distribution, heavy equipment, industrial fixed assets, oil & gas, maritime, mining and government.

With nearly 20 years of innovation and expertise in M2M, ORBCOMM has more than 1.3 million subscribers with a diverse customer base including premier OEMs such as Caterpillar Inc., Doosan Infracore America, Hitachi Construction Machinery Co., Ltd., John Deere, Komatsu Ltd., and Volvo Construction Equipment, as well as end-to-end solutions customers such as C&S Wholesale, Canadian National Railways, CR England, Hub Group, KLLM Transport Services, Marten Transport, Swift Transportation, Target, Tropicana, Tyson Foods, Walmart and Werner Enterprises.
