

ARMSTRONG TRANSPORTATION SELECTS ORBCOMM'S LOGISTICS TRACKING AND MONITORING SOLUTION FOR TRAILER FLEET

Maximizes trailer utilization, freight loads and driver efficiency

Rochelle Park, NJ, February 28, 2018 – ORBCOMM Inc. (Nasdaq: ORBC), a global provider of Machine-to-Machine (M2M) and Internet of Things (IoT) solutions, today announced that it has been selected by Armstrong Transportation (Armstrong) to provide an industry-leading logistics tracking and monitoring solution for their trailer fleet. ORBCOMM's end-to-end solution will provide wireless connectivity through its proprietary hardware and a web-based reporting platform for optimal fleet management.

An asset-based transportation provider based in Memphis, TN, Armstrong offers a wide range of services including full-truckload van service within a 700-mile radius of Memphis, dedicated fleets and full-service brokerage. Armstrong is using ORBCOMM's end-to-end telematics system, which is self-powered with solar recharging technology and does not require external power, to track and monitor its dry van trailers while en route or in terminals. The device's ruggedized, sealed and waterproof solar panel provides continuous power to rechargeable batteries, offering reliable service without maintenance or battery changes for the typical life of the asset. The complete ORBCOMM solution installs easily in less than 10 minutes, optimizing Armstrong's installation resources and costs and minimizing trailer downtime.

ORBCOMM's solution includes a robust web application with data reporting and analytics capabilities to increase visibility of Armstrong's trailers, improving the efficiency and security of its transport operations. With the ability to pinpoint a trailer's precise location at all times, Armstrong is not only able to haul more freight with the same amount of trailers but also save their drivers' time and fuel looking for empty trailers. ORBCOMM's telematics solution also integrates with the Prophecy TMS, enabling Armstrong to access trailer data where and when they need it, including operational condition, start/stop reports, scheduled maintenance, GPS position and geofencing, through one integrated system.

“We are enthusiastic about the continued growth in our dry van business and are pleased to add Armstrong Transportation to our impressive customer portfolio of the transportation industry's technology leaders,” said Marc Eisenberg, ORBCOMM's Chief Executive Officer. “ORBCOMM's telematics solution leads the market in terms of capabilities, reliability and longevity, and offers a clear advantage to customers wanting to better manage their trailer fleet and achieve a long-term ROI.”

“We have complete confidence in the battery life and durability of ORBCOMM's dry van solution and look forward to fully integrating their technology into our operations and seeing significant improvements in our trailer utilization and efficiency for years to come,” said Leo

Lazarus, Chief Operating Officer, Armstrong Transportation. “The insightful data and reports we can easily download from ORBCOMM’s web portal enable us to run our business smarter, increase our revenue stream and better serve our customers.”

Armstrong expects to complete deployment of ORBCOMM’s solution by Q2 of 2018.

About ORBCOMM Inc.

ORBCOMM (Nasdaq: ORBC) is a global leader and innovator in the industrial Internet of Things, providing solutions that connect businesses to their assets to deliver increased visibility and operational efficiency. The company offers a broad set of asset monitoring and control solutions, including seamless satellite and cellular connectivity, unique hardware and powerful applications, all backed by end-to-end customer support, from installation to deployment to customer care.
