

GLOBAL FISHING WATCH SELECTS ORBCOMM'S SATELLITE AIS SERVICE FOR NEW ONLINE TECHNOLOGY PLATFORM

Provides comprehensive, near real-time view of vessel location to improve management and regulation of commercial fishing activity worldwide

Rochelle Park, NJ, September 19, 2016 – ORBCOMM Inc. (Nasdaq: ORBC), a global provider of Machine-to-Machine (M2M) and Internet of Things (IoT) solutions, today announced that it has been selected by [Global Fishing Watch](#) to provide extensive global satellite [Automatic Identification System \(AIS\) data](#) from commercial fishing vessels for its new online technology platform. Global Fishing Watch is a collaboration by Oceana, Google and SkyTruth to end Illegal, Unreported and Unregulated (IUU) fishing by identifying fishing vessels and analyzing fishing activity to ensure environmental regulations are upheld. The platform was launched by actor and ocean advocate, Leonardo DiCaprio, at the Our Ocean Conference in Washington, D.C. on September 15, 2016, which was hosted by Secretary of State John Kerry.

ORBCOMM provides Global Fishing Watch with more than 20 million AIS data points every day that show the movement of the world's largest commercial vessels over time. By leveraging ORBCOMM's [AIS service](#), Global Fishing Watch can classify these time-stamped positional vessel data points as either "fishing" or "non-fishing" activities, enabling anyone in the world to have free access to a near real-time and/or historical global view of fishing activity. This robust platform will significantly increase the commercial fishing industry's accountability by allowing fisheries to identify unauthorized activity, while enhancing environmental regulation compliance and facilitating seafood supply chain transparency. It will also provide a tool to governments, non-government organizations (NGOs) and researchers for the enforcement of IUU regulations and [Marine Protected Areas](#) (MPAs).

"We are pleased to be an integral part of this new era in ocean resource conservation by powering Global Fishing Watch's new online platform with our industry-leading AIS service," said Marc Eisenberg, ORBCOMM's Chief Executive Officer. "By providing a comprehensive view of commercial vessel activity worldwide, we can help Global Fishing Watch better manage fishing quotas and harvesting and help preserve depleting ocean resources around the world, which are threatened by global overfishing, illegal fishing and habitat destruction."
