ORBCOMM WINS 2017 IOT INNOVATIONS AWARD
FROM CONNECTED WORLD

Recognizes ORBCOMM’s turn-key AssetWatch™ Mining platform for technological advancement and creativity in the IoT market

Rochelle Park, NJ, May 16, 2017 – ORBCOMM Inc. (Nasdaq: ORBC), a leading global provider of Machine-to-Machine (M2M) and Internet of Things (IoT) solutions, announced today that it has received the 2017 IoT Innovations Award from Connected World magazine for its turn-key AssetWatch™ Mining platform. By combining Real-Time Location Systems (RTLS), condition monitoring sensors, mobile devices and Cloud computing/analytics, ORBCOMM AssetWatch Mining enables comprehensive enterprise asset management for mine operators.

ORBCOMM AssetWatch Mining offers mission-critical visibility to enterprise assets whether they are above or below ground. From workers and railcars to trucks and miscellaneous machinery, AssetWatch Mining offers a single platform from which business owners and operators can get a unified, real-time view for monitoring mining assets. For mining operations and others that require underground work, the solution provides value by collecting and delivering real-time location, condition and activity data from assets as they move above and below ground. AssetWatch customers benefit by enhancing all areas of their operations, including production, vehicle fleet utilization, maintenance, and, most importantly, worker safety.

Built on ORBCOMM’s proprietary IoT software platform, the AssetWatch Mining solution is compatible with widely used underground Wi-Fi networks from Cisco Systems. AssetWatch Mining leverages ORBCOMM’s IoT stack to integrate various wireless devices from the field, including Bluetooth, Wi-Fi, cellular, satellite and RFID (radio-frequency identification), in conjunction with Cisco’s Wi-Fi networks and then transport data into a Cloud-based solution.

“As a leader and innovator in industrial IoT, ORBCOMM continues to develop stand-out technology solutions that transform how our customers operate their business and stay connected to their assets,” said Marc Eisenberg, ORBCOMM’s Chief Executive Officer. “ORBCOMM’s single-source AssetWatch Mining solution provides visibility and insight into mining operations through above and underground asset monitoring, which enables better decision making, asset utilization and emergency response.”

“Whether it’s vehicle tracking, people tracking, worker safety, sensor device integration, production tracking, or ventilation-on-demand, ORBCOMM’s AssetWatch Mining offers one of the industry’s most robust enterprise asset tracking solutions from a single platform,” said Peggy Smedley, Editorial Director of Connected World.

About ORBCOMM Inc.
ORBCOMM Inc. (Nasdaq: ORBC) is a leading global provider of Machine-to-Machine (M2M) and Internet of Things (IoT) solutions and the only commercial satellite network dedicated to M2M. ORBCOMM’s unique combination of global satellite, cellular and dual-mode network connectivity,
hardware, web reporting applications and software is the M2M industry’s most complete service offering. Our solutions are designed to remotely track, monitor, and control fixed and mobile assets in core vertical markets including transportation & distribution, heavy equipment, industrial fixed assets, oil & gas, maritime, mining and government.

With nearly 20 years of innovation and expertise in M2M, ORBCOMM has more than 1.77 million subscribers with a diverse customer base including premier OEMs such as Caterpillar Inc., Doosan Infracore America, Hitachi Construction Machinery Co., Ltd., John Deere, Komatsu Ltd., and Volvo Construction Equipment, as well as end-to-end solutions customers such as C&S Wholesale, Canadian National Railways, CR England, Hub Group, KLLM Transport Services, Marten Transport, Swift Transportation, Target, Tropicana, Tyson Foods, Walmart and Werner Enterprises.
