ORBCOMM LAUNCHES NEW SATELLITE MODEMS
TARGETED FOR SYSTEM INTEGRATORS AND RESELLERS

Hardware designed to operate with its current OG1 and next generation OG2 satellite networks

Rochelle Park, NJ, March 4, 2014 – ORBCOMM Inc. (Nasdaq: ORBC), a global provider of Machine-to-Machine (M2M) solutions, today announced the availability of its next generation OG2 satellite modems, which are ideal for Original Equipment Manufacturer (OEM) integration into satellite M2M applications targeted for the transportation & distribution, heavy equipment, oil & gas, and government markets. These powerful modems are 100% backwards compatible with ORBCOMM’s current OG1 satellite network and are the first devices available to support OG2 services upon launch of ORBCOMM’s next generation OG2 satellite constellation commencing in the spring of 2014.

ORBCOMM is offering two versions of its new satellite modem – the OG2-M with satellite communications and the OG2-GPS, which adds an on-board three-axis accelerometer and built-in GPS. With a single board transceiver and a footprint smaller than a credit card, both the OG2-M and OG2-GPS feature a single, wide-range power supply input, which provides significant flexibility for product designers. The modems also utilize an industry-standard PCI Express physical interface for easy integration into a broad range of M2M applications. The unique ability to individually control power to various sections of the modem enables the modems to achieve extremely low power consumption and provide increased longevity for battery-powered applications.

In addition, ORBCOMM has created a turn-key Developer’s Kit for the new modems that is designed to reduce development time and expedite the deployment of ORBCOMM-powered solutions in the field. The user-friendly kit includes an OG2 satellite modem, a modem evaluation board, universal power supply, antennas, USB to serial adapter, PC interface software to configure and control the modem, as well as a Quick Start Guide CD with full documentation. OEMs can utilize the kit to validate the modem’s compatibility with their existing applications and to benchmark modem and network performance.

ORBCOMM’s long-time partner, Quake Global, a leading manufacturer of asset tracking satellite M2M modems, is also offering a full suite of devices, including the QPRO, which will enable M2M communications across ORBCOMM’s OG1 and OG2 satellite networks. Quake Global’s dual-mode QPRO is a self-contained, environmentally sealed device with GPS tailored for M2M applications in the heavy equipment, transportation and oil & gas industries that are powered by ORBCOMM’s global networks.

“The commercial availability of these modems is an exciting next step in preparation for our upcoming OG2 satellite launch and further demonstrates ORBCOMM’s commitment to maintaining our market leadership in the global M2M space through continued innovation,” said Marc Eisenberg, ORBCOMM’s Chief Executive Officer. “Our new modems, which are 100% backwards compatible, will offer our customers immediate improvements in performance and
coverage with our current OG1 network, and further improvements in these areas upon the launch of our powerful next generation OG2 satellites commencing this spring.”

To order ORBCOMM’s OG2 satellite modems and Developer’s Kit, please contact Customer Service at 1-800-ORBCOMM or sales@orbcomm.com.

About ORBCOMM Inc.
ORBCOMM is a global provider of Machine-to-Machine (M2M) solutions. Its customers include Caterpillar Inc., Doosan Infracore America, Hitachi Construction Machinery, Hyundai Heavy Industries, I.D. Systems, Inc., Komatsu Ltd., Cartrack (Pty.) Ltd., and Volvo Construction Equipment, among other industry leaders. By means of a global network of low-earth orbit (LEO) satellites and accompanying ground infrastructure as well as our Tier One cellular partners, ORBCOMM’s low-cost and reliable two-way data communication services track, monitor and control mobile and fixed assets in our core markets: commercial transportation; heavy equipment; industrial fixed assets; marine; and homeland security.

ORBCOMM is an innovator and leading provider of tracking, monitoring and control services for the transportation market. Under its ReeferTrak®, GenTrak™, GlobalTrak®, and CargoWatch® brands, the company provides customers with the ability to proactively monitor, manage and remotely control their cold chain and dry transport assets. Additionally, ORBCOMM provides Automatic Identification System (AIS) data services for vessel tracking and to improve maritime safety to government and commercial customers worldwide. ORBCOMM is headquartered in Rochelle Park, New Jersey and has its network control center in Dulles, Virginia. For more information, visit www.orbcomm.com.

Forward-Looking Statements
Certain statements discussed in this press release constitute forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. These forward-looking statements generally relate to our plans, objectives and expectations for future events and include statements about our expectations, beliefs, plans, objectives, intentions, assumptions and other statements that are not historical facts. Such forward-looking statements, including those concerning the Company’s expectations, are subject to known and unknown risks and uncertainties, which could cause actual results to differ materially from the results, projected, expected or implied by the forward-looking statements, some of which are beyond the Company’s control, that may cause the Company’s actual results, performance or achievements, or industry results, to be materially different from any future results, performance or achievements expressed or implied by such forward-looking statements. In addition, specific consideration should be given to various factors described in Part I, Item 1A. “Risk Factors” and Part II, Item 7. “Management’s Discussion and Analysis of Financial Condition and Results of Operations,” and elsewhere in our Annual Report on Form 10-K for the year ended December 31, 2012, and other documents, on file with the Securities and Exchange Commission. The Company undertakes no obligation to publicly revise any forward-looking statements or cautionary factors, except as required by law.
